EXPERIENCE

Flutter Developer   Aug 2023 — Present
Smarther Technologies   *Chennai, IN*

- Spearheaded the creation of multiple flutter apps, showcasing expertise in Mobile Application Development and OOPS concepts; driving revenue growth for the company.
- Optimized backend processes of existing applications, resulting in a 25% reduction in system downtime, boosting overall performance and customer satisfaction.
- Orchestrated seamless integration of web services (REST, JSON) to enhance functionality and deliver real-time data, resulting in response time and improved user experience and Firebase - Remote Config & App Distribution.
- Implemented Third Party Components for Camera and GPS integration into mobile applications.
- Deployed payment method – Razor Pay.

Junior Web Developer – Part Time   June 2022 — July 2023
Thulir   *Singapore*

- Showcasing expertise in creating responsive web pages using HTML, CSS, BootStrap, JavaScript, jQuery.
- Designed and developed 2+ static web pages (during my college days).

PROJECTS

Elzsi Task Manager

- Led the creation of a versatile real estate application where the brokers can send request to builders. After approving the request, the builders can assign the brokers to their plots to update entries of every customer with reminder date to receive the push notification.
- Technologies: Flutter, SharedPreferences, SQLite, Firebase.
- Playstore link: Elzsi Task Manager

Call City Hours

- Developed and implemented a home service app, where the people can find the common home services like plumbing, electrical works etc.
- User can add the address by using device's current location.
- Placing order is very simple and user friendly – Adding the services to cart, selecting the address and confirm the order.
- Technologies: Flutter, SharedPreferences, Hive, Geolocator, Geocoding, Firebase.

Murali's Super Market

- Developed and implemented an E-commerce app, where the people can find fruits, vegetables, grains and buy those items.
- In this app, the user can add a product to cart with different varients in different quantities. Also, the user can create more number of wishlists to buy the products in future.
- User can add the address by using device's current location.
- Technologies: Flutter, SharedPreferences, Hive, Geolocator, Geocoding.

EDUCATION

Bachelor in Computer Applications, *AVVM Sri Pushpam College*   2020 - 2023
